

Hi

Thanks for all your great work

I would like the following tasks carried out

- 1) H2 and H4 tags are the most used headings. I think H1 not used on website now. Do you think it is worth changing CSS for H1 to current H2. I can then change H2 to H1 tags for SEO purposes.
- 2) I am having trouble inserting some simple code for recognition by affiliate marketing. Either a file to be created in the root directory or meta name =verification tag. I have inserted but can't seem to make it work
- 3) Creative commons have created a further licence [Creative Commons — Attribution-ShareAlike 4.0 International — CC BY-SA 4.0](#), could you add this to the submission choices and article display.
- 4) For each article page have a meta tile = article title then DOI, then (all) authors surname, have meta description = article field subject,
- 5) I want to update the licence icons as they seem a bit blurry.
- 6) On the homepage slider could you change the slide across effect with a fade into from one slide to the next.
- 7) Might need to tweak the article list in category and search in terms of font and background padding.
- 8) Could you highlight all active CSS with descriptions?
- 9) Indent most watched
- 10) Add orcid link to author links on article display page (For all authors), add all author links to search output list and topic list, add first 2 lines of abstract to search output or subject list with drop down for more

Copy following appearance note colours and fonts (+ keep star rating at bottom, reduce size of star rating) for search output and subject list

The screenshot displays the Dimensions website interface. On the left, there are filter sections for 'PUBLICATION YEAR' (ranging from 2017 to 2022), 'RESEARCHER', 'RESEARCH CATEGORIES', 'PUBLICATION TYPE', 'SOURCE TITLE', 'JOURNAL LIST', and 'OPEN ACCESS'. The main content area shows search results for '143,983,628' publications, listing various articles with their titles, authors, and publication details. On the right, there is an 'ANALYTICAL VIEWS' section featuring a 'RESEARCH CATEGORIES' list, an 'OVERVIEW' section with a line graph showing 'Citations (Mean)' over time, and a 'RESEARCHERS' list with names and citation counts.

- 11) Generate web browser tab logo (favicon) for the website using current logo.
- 12) May need help with google tags, minor changes to fonts colours alignments
